

AVerTV Hybrid TVBox 13 A200P

Easily Connect All Your A/V Devices & Live TV into One Hub

Turn your monitor into a TV. You can enjoy analog or digital TV (ATSC / Clear QAM) in your monitor with AVerTV Hybrid TVBox 13. The video source from DVD, Projector, VHS and more can be transferred into different sources on various displays via AVerTV Hybrid TVBox 13.

Features

- Support dual screen output
- Supports Resolution up to 1080p
- Multi-I/O Converter
- Control sources easily by remote control

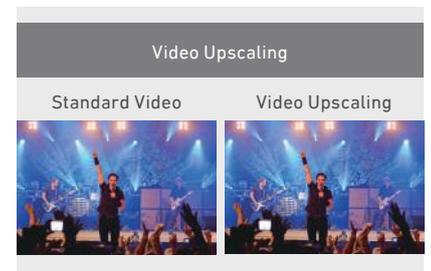

Dual Screen Output

The AVerTV Hybrid 13 can be outputted the same image into two screens via different I/O port

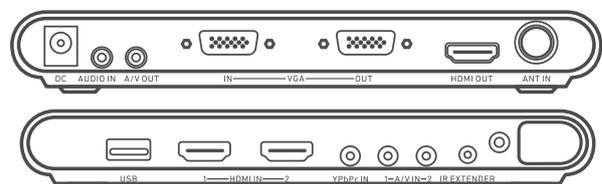

Perfect Video Image Up to 1080P

It can upscale a signal from a lower resolution upscale to 1080P. Through the advanced 3D Y / C and noise reduction, edge enhancement and color adjustment technology, the AVerTV Hybrid TVBox 13 eliminates jagged edges on TV and DVD movies to improve the clarity and sharpness of the overall image.

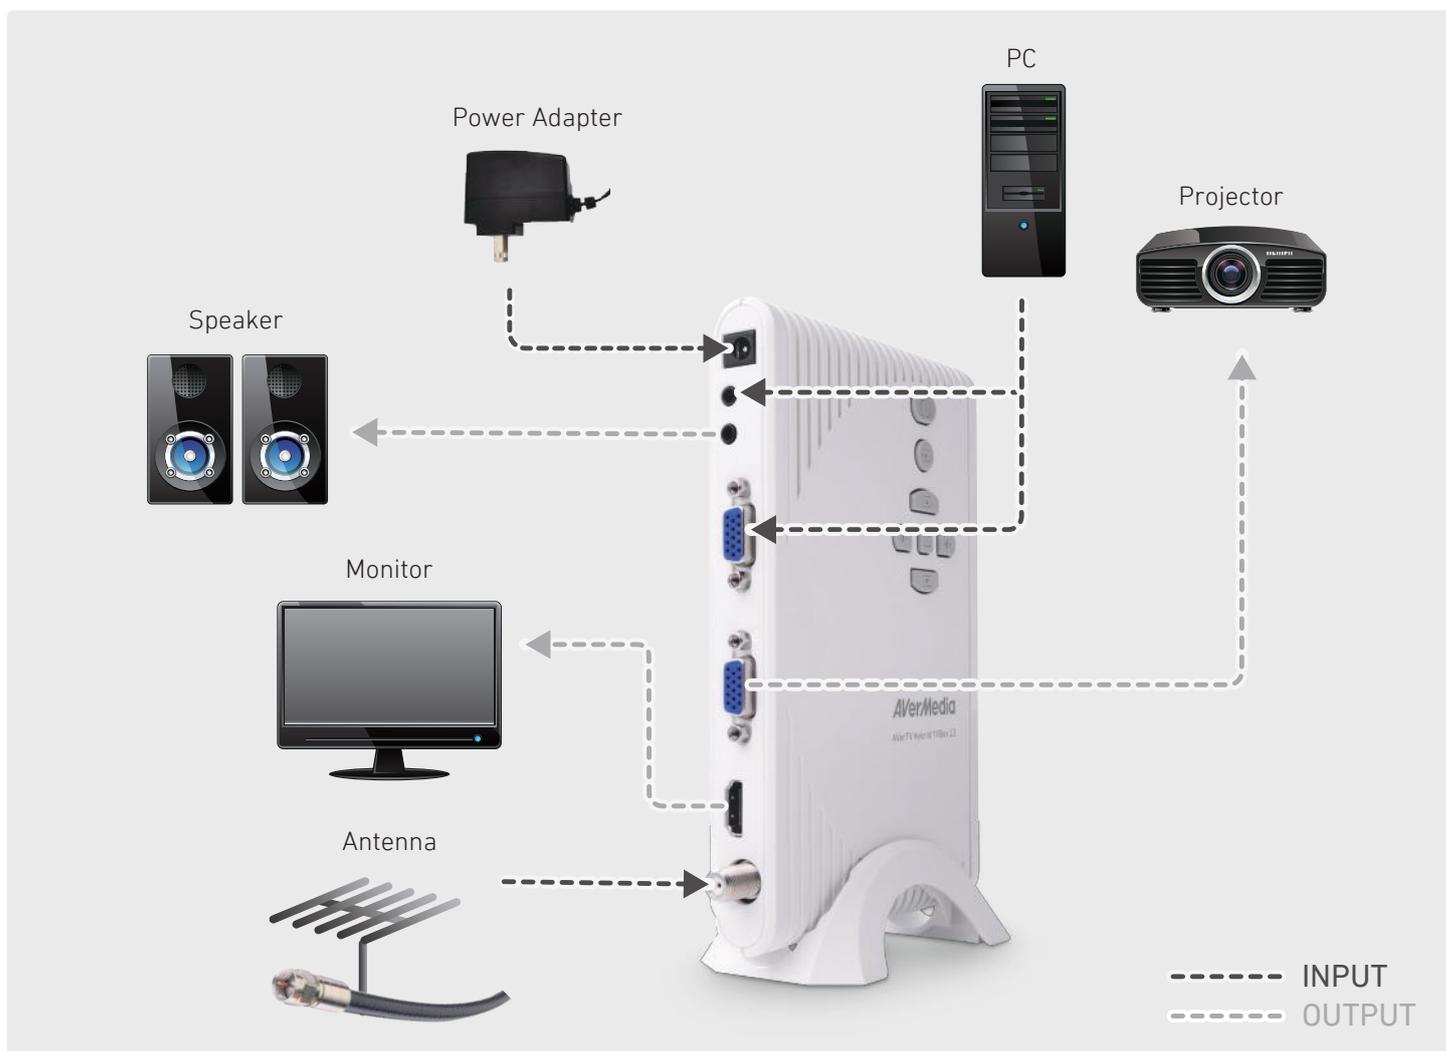

Support Multi-I/O Convert

Built in multi-I/O with VGA, HDMI, Component and composite port. It can past the video from old equipment to new display.
